Great Value

Always Undercutting our competitors!

We aim to undercut the competition by working smart!

Using the latest technology

Overheads are reduced with the use of the latest technology enabling staff to multi-task. Technology has changed dramatically in the last five years and the necessity for huge OB trucks and one person controlling graphics, or sound are a thing of the past.

Being “cutting edge” means we can streamline processes and amalgamate functions. These innovations mean dramatic cost reductions compared with traditional production companies in the sector, which we pass on to our clients.

We believe in good quality coverage at sensible rates so you can get your sport on TV as much as possible.
